Simatek Bag Filter Technology
for the Aqua Industry

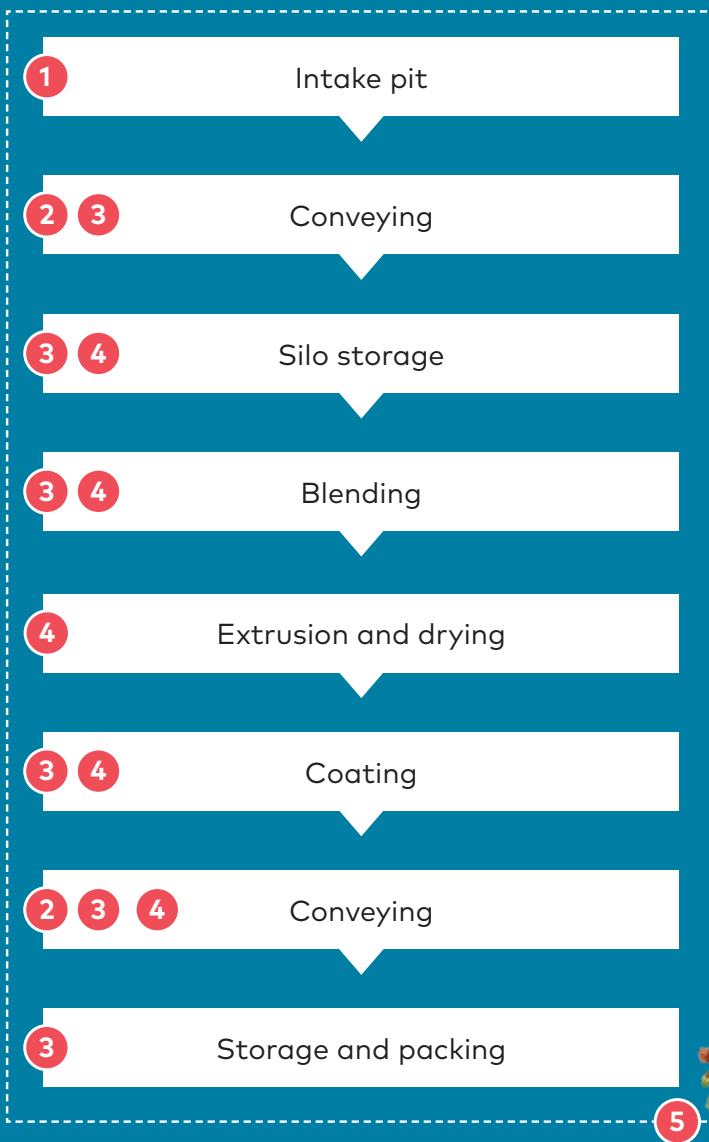

Simatek Bag Filter Technology for the Aqua Industry

Industry challenges

Manufacturing high-quality dry and wet food and food supplements from aqua-culture requires an increasing variety in their composition and production processes.

Our filtration technology is suited to handle the processes involved – grinding, mixing, extruding, drying, cooling and packing. We do this by ensuring secure production areas, optimised processes and optimised product recovery while meeting the necessary quality and emission requirements.

SimPit Intake-pit Filter

A flexible modular filtration system tailored to suit both existing and newly established intake aspiration pits.

SimSpot Spot Filter

A miniature bag filter suitable both as a stand-alone solution and as an extension to central aspiration plants.

SimPact 4T-R

A cost-efficient solution with a robust construction and reliability which can separate many dust types – fine, abrasive or explosive.

SimPact 4T

A cost-efficient, low maintenance solution that gives you the benefit of savings and low emissions.

SimVac

Central vacuum-cleaning system ensures a safe, clean working environment with optimal work conditions.

SimPact 4T-R type 03

Round filter solution as build-on for silos, grinders or coolers.

On-shore

An optimised investment. Efficiently delivered.

Founded in 1981, Simatek is a leading manufacturer of industrial air filtration solutions. Our high-tech products and systems optimise footprint, performance and maintenance for industrial plants worldwide. All at a low cost of ownership.

Our main areas of expertise:

- Dust collection and aspiration: A wide range of pulse-jet bag filters designed to work with dust explosive atmosphere and meet international standards and certifications.
- Process air: A range of sanitary and non-sanitary bag collectors for the processing industry – including process filters with Cleaning in Place (CIP) and super sanitary bag collectors conforming to the 3-A standards and USDA guidelines.

Unique technology and specialised expertise are at the heart of everything we do at Simatek. Our core team of dedicated employees – alongside our global network of partners and representatives – are ready to help you find the solution that will benefit your business the most.

We call this an optimised investment, effectively delivered.
