

*Customer name			*Country:		
Site location					
Date of quotation:					
Date of contract:			Date of delivery:		
Date of commissioning:					
Process					
*Air flow to bag filter	kg/h				
*Air temperature, operation	°C				
Filter load (A/C ratio)	m³/m²/min				
Emission max	mg/Nm³				
Bag filter for type of process	Select =>				
*Cyclones before bag filter	yes/no				
Powder	Design product	#1	#2	#3	#4
*Name					
Particle size distribution - Dv(10) and Dv(50)	µm				
Dust load - air to bag filter:	g/m³				
Characteristics	fatty/sticky/hygroscopic/abrasive				
*Kst value	Bar * m/s				
*Max. explosion pressure Pmax	Bar (g)				
Choice of product contact material					
Mild steel - AISI304 - AISI304L - AISI316 - AISI316L					
Insulation or heating jacket					
Heating jacket (full welded w. hot air)					
Mineral wool (100mm) and cladding					
Air gap insulation (detachable)					
CIP					
*CIP of bag filter	yes/no				
*CIP of filter bags inside	yes/no				
*Max CIP time	Hours				
Explosion and fire protection					
*Explosion venting standard	EN / NFPA			Eath quake zoning remarks	
*Explosion panels					
*Explosion panels positioning					
*Explosion suppression on bag filter cone					
*Explosion isolation before bag filter					
*Fire extinguishing					
Dimensions					
*Max. height from bag filter outlet to ceiling					
*Max. bag filter cylinder body diameter					
Supervision					
Assembly supervision if filter delivered in sections					
Installation supervision					
Start-up
